

You know all the advantages of electronic invoicing?

Traceability

Acknowledgments of sent invoices ensure that they have come to the correct recipient. You always know where the invoice is!

Secure

Surely any errors on invoices are detected immediately and reported back to the sender.

Profitability

The cost of postage, envelopes, paper and working time is reduced significantly.

Simple

With a single keystroke or automatically sent all your invoices electronically.

Gentle on our environment

E-invoicing saves on Earth's resources when neither paper, ink or long journeys.

Electronic invoicing

– Increase efficiency and environmentally friendly

In order to increase efficiency regarding supplier invoices, Stena Line Group will go from scanning of invoices to electronic invoicing. Please observe that e-invoicing is a file transfer and **not** a pdf attached invoice in a mail

"In all our future agreements, we will require electronic invoicing"

By sending e-invoices you further strengthen our cooperation and thus creating less administration. Supplier choosing to send e-invoices will be favored further on. Furthermore e-invoicing is environmentally friendly.

We at Stena Line are convinced that with help from Pagero Nordic AB you will find a solution for your business, if you haven't an existing solution to send e-invoices today.

To start send e-invoice to us, please find information at Pageros webpage:
